PROFESSIONAL SUMMARY

Data analyst with 4+ years across project, program, and business data — data preparation, validation, SQL-based analysis, and reporting in Excel, Power BI, and Tableau. Delivered program evaluation across 402 participant records and 320+ qualitative responses, and built classification models evaluated on precision, recall, and F1 in a published analytics portfolio.

CORE COMPETENCIES

Databases & Query: SQL (joins, CTEs, subqueries, window functions), Snowflake (coursework), relational databases (RDBMS)

Programming & Analysis: Python (pandas, NumPy, scikit-learn), Jupyter Notebook, EDA, statistical analysis, trend & variance analysis

Business Intelligence: Power BI, Tableau, DAX, Power Query, data modeling, dashboard development

Survey & Program Analytics: Qualtrics, Jotform, survey administration, thematic & qualitative analysis, KPI development, executive reporting

Advanced Excel: Power Query, Excel data models, PivotTables, XLOOKUP, dynamic arrays, advanced formulas, dashboards

Tools: Git, GitHub, Microsoft Office, Google Workspace

PROFESSIONAL EXPERIENCE

Data Analyst — Forman Technology, Austin, TX (Remote) | 06/2026 – Present

- Prepare, validate, and reconcile datasets for analytics engagements using SQL and Excel, supporting downstream reporting.
- Write SQL queries to extract, transform, and quality-check data for recurring client and internal reporting outputs.
- Build and maintain reporting and dashboard outputs for stakeholders across operational and performance KPIs.

Data & Evaluation Analyst (Volunteer) — Chosen Hearts (Nonprofit Organization) | 03/2026 – Present

- Integrate 402 participant records across 23 program sessions into an Excel Power Query model, automating KPI reporting.
- Evaluate 320+ qualitative responses through thematic analysis (188 comments, 132 recommendations), surfacing program needs.
- Measure outcomes across 3 cohorts: 82.6% retention intent, 81.8% wellbeing improvement, 58.7% learning effectiveness.
- Present findings in Excel dashboards and executive reports, converting results into leadership recommendations.

Office Assistant — University of Tampa, Tampa, FL | 05/2024 – 02/2025

- Administered a Qualtrics survey capturing 133 graduate student responses for program-satisfaction analysis.
- Interpreted 17 evaluation metrics and 80 qualitative comments in Excel, pinpointing satisfaction gaps.
- Synthesized findings into stakeholder reports, recommending improvements to career services and networking.

Data Analyst — Studio Opinions, Nellore, India | 01/2021 – 04/2024

- Maintained project, cost, and resource records across 35+ architectural projects, standardizing data for portfolio reporting.
- Tracked project budgets and budget variances, flagging cost deviations for management review.
- Produced recurring Excel reports on project delivery, labor utilization, and profitability for management.

Business Analyst Intern — OESON, Remote | 11/2022 – 02/2023

- Analyzed the Fyntra customer dataset in Excel — session length, membership duration, app vs. website time, and yearly spend.
- Wrote SQL against a six-table IMDb dataset using joins, CTEs, subqueries, and window functions to answer business questions.
- Built Tableau dashboards on IPL match data covering toss outcomes, biggest wins, and seasonal team performance.

PROJECTS

Bank Customer Churn Prediction & Risk Segmentation — Python, scikit-learn, pandas | 07/2026

- Profiled 10,000 bank customer records across 13 demographic and financial variables in Python, assessing class imbalance (20.4% churn), correlations, and feature distributions.
- Engineered balance-to-income and demographic band features, then trained Logistic Regression and Random Forest classifiers evaluated on accuracy, precision, recall, and F1 against a held-out test set.
- Tuned the Random Forest with RandomizedSearchCV to 86.0% test accuracy and 78.8% precision (vs. 81.2% / 61.8% for the Logistic Regression baseline), then re-tuned the baseline's decision threshold to 0.34 to lift recall on the minority class.
- Ranked the top 20 churn drivers by feature importance, isolating older age, low product adoption, and inactivity.
- Documented as a published case study with workflow diagrams and a full model comparison in my analytics portfolio.

EDUCATION

Master of Science (MS) in Business Analytics — The University of Tampa | 08/2023 – 05/2025

Bachelor's in Computer Science and Engineering — Lovely Professional University
